• INDEX VOLUME 35 •

A

Abbott, S.: A wider vision of optoelectronics 211
Aids for the disabled (letter) 296
AI, new, product from new AI company 194
Ahmed, K.: Taming the Hong Kong dragons (letter) 263
Allcock, J.P.M.: Patent disputes (letter) 140
Allen, J.E.: Defining the ampere (letter) 176
Alvey DHSS demonstrator project ends 157
AM terrestrial broadcasting — past, present and future by J. Wood 89
AM terrestrial broadcasting (letters) 219
Applied enters metal-CVD market 316
Appropriate technology (letter) 218
Appropriate technology — rural electrification in developing countries by R. Holland 251
Aspden, H.: Changing the rule of law (letter) 24
AT-PS/2 compatible computer on the STE bus 316
Atherton, W.A.: Ten great ways to kill an idea 15
Autoroute for Atari or IBM PC 43

B

Bacon, W.: The Finnish (letter) 297
Badger, E.: Terrestrial broadcasting (letter) 262
Baked chips, avoiding 320
Baltic, power under the 276
Barsoux, J.L.: Leaders for every occasion 26
Benham, S.F.: Electric fields and health (letter) 73
Beta Award, ovations for 3
Bissell, C., and Chapman, D.: Modelling applications of spreadsheets 267
Blister booth 154
Blythe, P., and Hills, P.: (see Hills) 377
Bray, W.J.: Musing about MUSA (letter) 176
British Electronics Week 'bigger than ever' 120
Broadcasting, AM terrestrial — past present and future by J. Wood 89
Broadcasting, the future of terrestrial — the short-wave super transmitter by J. Wood 131
BT after Macdonald by J.M. Harper 200
BT selects Oracle 354
Burnett, D.G.: AM terrestrial broadcasting (letter) 219
Buses for instruments 84
BYPS adopts CAI from the start 358

C

Cable & Wireless — from Victorian to modern times by J.E. Packer 63
Cardwell, D.A.: Electronic potentialities of high-temperature superconductors 57
Carpenter, C.J.: Defining the ampere (letter) 176
Carter, C.J.: Radar reminiscences (letter) 338
CEGB in submarine experiment 359
Cellphone aerial 278
Cellphone, smallest personal 197
Cellular's performance report 236
Chan, W.S.: Eastward, ho! 123
Changing the rule of law (letters) 24, 140, 218
Channel Tunnel safety (letter) 297
Chapman, D., and Bissell, C.: (see Bissell) 267
Chatsworth House — working on water by P. West 404
Cheap gigawatts (letter) 24
Cheng, H.: Taming the dragons (letter) 338
Chip, Britain's greatest 114
CHP, clean-coal 198
Coates, R.: Changing the rule of law (letter) 140
Colbeck, D.: Public telecoms networks 37
Cold power 199
Cold water on cold fusion. Harwell stops experiments by R. Dettmer 256
Colouring by numbers — the use of video look-up tables by G. Looker 189
Comex '89 318
Comex '89, minister breaks with tradition at 400
Computer-aided building-design software package 46
Computer viruses — a solution (letters) 219, 338
Copyright, Designs and Patents (letter) 72
Crabtree aims for pole position 157
Cragside — the first home of hydro power 246
Crew, E.: Channel Tunnel safety (letter) 297
Crosstalk 200
CT2 — a new generation of cordless phones by D. Moralee 177
CT2, a transcoder for, parts of speech by R. Dettmer 305

D

Data, black box for 116
Davies, I.F.: Early days of lighting (letter) 73
Decongesting London 276
DEC that's not a VAX 46
Dedeke, A.: Developing engineers (letter) 369
Defining the ampere (letters) 96, 176, 263
De Rivaz, J.: Computer viruses — a solution (letter) 219
Design, steering, into the future 82
Designing for interference 320
Designs, student 82
Dettmer, R.: Clear signals at ICASSP 89 222
Dettmer, R.: Parts of speech — a transcoder for CT2 305
Dettmer, R.: The fifth generation — coming of age? 202
Dettmer, R.: Cold water on cold fusion. Harwell stops experiments 256
Dettmer, R.: Digital short-range radio 243
Dettmer, R.: Formal chip design — a functional approach 183
Dettmer, R.: GaAs on Si — the ultimate wafer? 136
Dettmer, R.: JTAG — setting the standard for boundary-scan testing 49
Dettmer, R.: Logic synthesis — a faster route to silicon 427
Dettmer, R.: Meet the President 324
Dettmer, R.: Optical amplifiers — light boosters in a chip 107
Dettmer, R.: Polysilicon thin films — a UK first 18
Dettmer, R.: Safe integral reactor — pacifying the PWR 387
Dettmer, R.: Stretching the fibre 19
Dettmer, R.: The VXI bus — an open standard for modular instrumentation 327
Dettmer, R.: Trunked private mobile radio — a lead from the electricity industry 223
Developing engineers (letter) 369
Developing engineers — some reflections on university education in developing countries by A.A. Zaky 229
Dewing, A.: Appropriate technology (letter) 218
Digital short-range radio by R. Dettmer 243
Disabled, technical aids for the by C. Thornett 165
Disc system, 650 Mbyte 154
Display, big, by Hughes 119
Display, plasma 194
Dolbey Jones, D.A.: The Electricity at Work Regulations 1989 247
DRAM, fastest 1 Mbit 236
DRAMS, 4 Mbit, from Toshiba 116
DTI in action 116
DTI raises the alarm 47
Dungeness, safety at 278

E

Early days of lighting (letter) 73
Earth terminal 120
Earthwatch-sensing of the Earth and its climate from space by J.E. Harries 371
Eastward, ho! by W.S. Chan 123
Edgley, R.K.: Taming the dragons — designer danger out of the Hong Kong MTR 171
Ekwue, A.: Energy supply in Nigeria 299
Electric fields and health (letter) 73
Electricity at Work, the, Regulations 1989 by D.A. Dolbey Jones 247
Electricity in Finland by D. Lidgate and D. Moralee 67
Electricity prices 'disadvantage UK industry' 199
Electrifying women (letters) 426
Electrifying women — a solution to the skills shortage by Baroness Platt of Writtle 333
Electronics indices 157
Ellis, B.N.: Where would you live? (letter) 368
ENDS for LEB 84
Energy conservation, electronics in by K. Smith 287
European Report by G. Roberts 34, 54, 95, 130, 162, 209, 242, 284, 322, 362, 414
Expert systems 196
Exploring reciprocal facilities in Hungary by J.R. Mansell 11

F

Fax, the paperless 86
Fellgett, P.: Musing about MUSA (letter) 73
Fibre-optic trial, green light for BT's 396
Fibre, stretching the by R. Dettmer 19
Fifth generation, the, coming of age? by R. Dettmer 202
Finnish, the (letters) 297
Finnishing the argument! (letter) 219
Finniston Award, colour LCDs win 398
Formal chip design — a functional approach by R. Dettmer 183
Foulsham, N.: Not convinced (letter) 82
French connection, the 82

G

GaAs on Si — the ultimate wafer? by R. Dettmer 136
Gardner, P.: Parliamentary bias? (letter) 72
Gas-turbine contract, French-speaking Scots win Morocco 396
Government talks to itself 86
GPT adds Unix to System X 358
Gray, C.: Changing the rule of law (letter) 218
Gray, J.: Radar reminiscence (letter) 141
Grid, preparing the, for privatisation 120
Guilding light — an interview with Professor Charles K. Kao 160

H

Hadekel, R.: Changing the rule of law (letter) 140
Harper, J.M.: BT after Macdonald 200
Harries, J.E.: Earthwatch — sensing of the Earth and its climate from space 371
Harrop, P.: New electronics for payment 339
Helsinki howl, the (letter) 73
Hewkin, P.: Smart tags, the distributed-memory revolution 203
Higgins, R.: The Finnish (letters) 141, 297
Hills, P., and Blythe, P.: Paying your way 377
Hipparcos — a yardstick for the universe by M. Williamson 280
Holland, R.: Appropriate technology — rural electrification in developing countries 251
Home automation (letters) 24, 141
Hungary, exploring reciprocal facilities in by J.R. Mansell 11
Hutcheon, K.F.: AM terrestrial broadcasting (letter) 219

I

ICASSP 89, clear signals at by R. Dettmer 222
Ice, breaking the 281
Image analysis by R. Owen 77
Innovation and the law by V. Irish 264
In Retrospect 39, 66, 105, 125, 168, 201, 298, 349, 356, 423
Irish, V.: Innovation and the law 264
IT, more money for 198

J

James, R.J.: A history of radar 343
JET set to reach breakeven 400
JTAG — setting the standard for boundary-scan testing by R. Dettmer 49
Jupiter, the scenic route to by M. Williamson 314

K

Kao, C.K. Guiding light 160
Kapp, J.: Parliamentary bias? (letter) 72
Kenyon, N.: Picture update (letter) 96
Killing thoughts (letter) 96
Kingsley, F.A.: Radar reminiscences (letter) 296

L

Lakshmanan, K.: Plumbing the depths — telemetry and telecontrol for offshore oil installations 415
Larkins, D.H.: Radar reminiscences (letter) 218
LDEF — the ultimate stocking filler? by M. Williamson 401
Leaders for every occasion by J.L. Barsoux 26
Lee, Y.C.: Taming the Hong Kong dragons (letter) 263
Leonard, Capt. A.W.: Radar reminiscences (letter) 296
Lewis, G.G.E.: Home automation (letter) 24
Lidgate, D., and Moralee, D.: Electricity in Finland 67
Light, memories of by M.A. Perry 291
Lloyds building floodlighting 43
Logical synthesis with Locam 158
Logic analyser for under £1000 158
Logic-analyser market, MI enters 154
Logic analysis system, the CLAS 4000 6
Logic synthesis — a faster route to silicon by R. Dettmer 427
Looker, G.: Colouring by numbers — the use of video look-up tables 189
Lloyd, M.M.: Computer viruses (letter) 338

M

Mansell, J.R.: Exploring reciprocal facilities in Hungary 11
Mansell, J.R.: Thin displays for television 257

Marks, B.: RDS, the way ahead for radio 127
Mayes, V.: SI and the typewriter (letter) 368
Medical record cards 6
Meet the President by R. Dettmer 324
Memories of light by M.A. Perry 291
Memory without discs 316
Microcontroller from Hitachi, 16 bit 6
Micro-hydro meeting 276
Miles, R.: Networks and protocols 282
Milne, K.: Personal computers and the one-man band 407
Modelling applications of spreadsheets by C. Bissell and D. Chapman 267
Molyneaux, M.W.: Copyright, Designs and Patents (letter) 72
Monitoring and control system 116
Moralee, D.: Companies line up for PCN battle 364
Moralee, D.: CT2 — a new generation of cordless phones 177
Moralee, D., and Lidgate, D.: (see Lidgate) 67
More of the same 354
Munasinghe, M.: Power for development — electricity in the Third World 101
Murdoch, P.: The Helsinki howl (letter) 73
Murphy, B.: Parliamentary bias? (letter) 72
Musing about MUSA (letters) 73, 176

N

NEI to merge, Rolls-Royce and 154
NEL, phased sell-off for 199
Networks and protocols by R. Miles 282
Newton, P., and Strassheim, P.: Power hybrids, developments in packaging technology 149
Nigeria, energy supply in by A. Ekwue 299
Not convinced Pletter) 426
Nuclear family, National Power plans 234
Nuclear power 'could work in privatised ESI' 400
Nuclear's world market share 236

O

Okaru, P.N.: Power for development (letter) 262
Optical amplifiers, BTRL boost for 197
Optical amplifiers — light boosters in a chip by R. Dettmer 107
Optical neurons 84
Optoelectronics, a wider vision of by S. Abbott 211
Owen, R.: Image analysis 77

P

Packer, J.E.: Cable & Wireless — from Victorian to modern times 63
Parallel standards 356
Parliamentary bias? (letters) 72, 176
Parliamentary Report by P. Oppenheim MP 35, 92, 122, 208, 285, 361
Parton, C.: Defining the ampere (letters) 96, 263
Patent disputes (letter) 140
Payphone kiosks 234
Paying your way by P. Hills and P. Blythe 377
Payment, new electronics for by P. Harrop 339
PCBs, finding fault with 359
PCN battle, companies line up for by D. Moralee 364
Pegg, B.: Home automation (letter) 141
PEP, flowerpots with 3
Perry, M.A.: Memories of light 291
Personal computers and the one-man band by K. Milne 407
Phone me up, Scotty 274
Picture update (letter) 96
Pictures by telephone by P. Wright 7
Platt, Baroness of Writtle: Electrifying women — a solution to the skills shortage 333
Plumbing the depths — telemetry and telecontrol for offshore oil installations by K. Lakshmanan 415
Polysilicon thin films — a UK first by R. Dettmer 18
Power cut by Hartley 354
Power Plant, the growing 196
Power play at Savoy Place 274
Power under the Baltic 276
Power hybrids — developments in packaging technology by P. Newton and P. Strassheim 149
Powering up by J.G.W. West 29
Power for development (letter) 262
Power for development — electricity in the Third World by M. Munasinghe 102
Power on the small screen 46
Pressure?, working under 158
Private advanced radio system (PARS) 4
Protocols, networks and by R. Miles 282
Public telecoms networks by D. Colbeck 37
Putting you in the radar picture (letter) 73

R

Racal Redac, a good buy for 234
Radar, a history of by R.J. James 343
Radar reminiscences (letters) 73, 141, 218, 296, 338
Radio, digital short-range by R. Dettmer 243
Radio telescope 236
Radio, trunked private mobile, a lead from the electricity industry by R. Dettmer 223
RDS, the way ahead for radio by B. Marks 127
Ringing the changes 278
Rolls-Royce and NEI to merge 154
Rowe, R.P.: Terrestrial broadcasting (letter) 262

S

Safe integral reactor — pacifying the PWR by R. Dettmer 387
Safety at Dungeness 278
Salary Survey 1989 (March) (i)-(viii)
Satcoms for Asia 4
Satellite TV, administering 398
Scadix, Siemens shows 4
Scitech 89 114
Scroggie, M.G.: Radar reminiscences (letter) 218
Sellafield 'safer than Cornwall' 114
Sensors & Systems 318
SERC forges links 3
SETCIM from Scicon 84
Sewill, J.: A woman in a man's world 215
Short, R.: Sting Ray — a sound-seeking missile 419
SI and the typewriter (letter) 368
Siemens takes the RISC 356
Simmonds, I.M.: Electrifying women (letter) 426
Smart tags, the distributed-memory revolution by P. Hewkin 203
Smith, K.: Electronics in energy conservation 287
Space at Le Bourget by M. Williamson 238
Speech, parts of, a transcoder for CT2 by R. Dettmer 305
Speedometer system 119
Spot — images from orbit by M. Williamson 367
Spreadsheets, modelling applications of by C. Bissell and D. Chapman 267
Standards, changing 198
Steele, T.: Electrifying women (letter) 426
Stevens, A.J.: Putting you in the radar picture (letter) 73
Sting Ray — a sound-seeking missile by R. Short 419
Stotfold, 20 years in 316
Strassheim, P., and Newton, P.: (see Newton) 149
Street lighting 197
Stretching the fibre by R. Dettmer 19
Sub-station 157
Superconductors, electronic potentialities of high-temperature by D.A. Cardwell 57
Swift-Hook, D.T.: Cheap gigawatts (letter) 24
Switching system 47
Systems in engineering by P. Vernon 383

T

Tags, no snags with, in Thames crossing trials 240
Taking VME on board 158
Taming the dragons — designing danger out of the Hong Kong MTR by R. Edgley 171
Taming the Hong Kong dragons (letters) 263, 298, 338
Telecoms network tester 194
Telephone, pictures by by P. Wright 7
Telephone poles 198
Telepoint, talking has stopped on 281
Television, thin displays for by J.R. Mansell 257
Ten great ways to kill an idea by W.A. Atherton 15
Terrestrial broadcasting (letters) 262
The Finnish (letter) 141
The professions, complacency or progress? 143
Thin displays for television by J.R. Mansell 257
Thomson, F.P.: Finnishing the argument! (letter) 219
Thornett, C.: Technical aids for the disabled 165
Toshiba expands 194
Total Solutions, Triad winners at 394
Transatlantic pager 354
Transputer, mass-market 318
Trunked private mobile radio — a lead from the electricity industry by R. Dettmer 223
Turkish power station to be 'world's most efficient' 396

U

UK out of step 278
UKAEA, commercial arm for 199
UPSs, 'online' 114

V

Vaughan, J.F.O.: Radar reminiscences (letter) 73
Vector offers DC precision with AC drive 394
Vernon, P.: Systems in engineering 383
Video phones 4
Viper, G'day 84
Virus, catching a 281
VLSI, new design tools from 318
VME on board, taking 158
VXI bus, the, an open standard for modular instrumentation by R. Dettmer 327

W

Walters, L.A.: Aids for the disabled (letter) 296
Ward, T.G.: AM terrestrial broadcasting (letter) 219
West, J.G.W.: Powering up 29
West, P.: Chatsworth House — working on water 404
Where would you live? (letter) 368
Willcock, Capt. C.B.: Killing thoughts (letter) 96
Williamson, M.: Hipparcos — a yardstick for the universe 280
Williamson, M.: LDEF — the ultimate stocking filler? 401
Williamson, M.: Spot — images from orbit 367
Williamson, M.: The scenic route to Jupiter 314
Williamson, M.: Space at Le Bourget 238
Woman, a, in a man's world by J. Sewill 215
Women, electrifying, a solution to the skills shortage by Baroness Platt of Writtle 333
Wood, J.: AM terrestrial broadcasting — past, present and future 89
Wood, J.: The future of terrestrial broadcasting — the short-wave super transmitter 131
World's largest machine, the 236
Wright, P.: Pictures by telephone 7

Z

Zaky, A.A.: Developing engineers — some reflections on university education in developing countries 229
Zonephone up and running too 354

BOOKS

Algar, J., and Clayton, R.: (see Clayton) 272
